Quality Assurance Analyst

Agile | Manual Testing | API Testing | SQL | SaaS Applications

SUMMARY

Quality Assurance Analyst with hands-on experience testing SaaS and e-commerce applications in Agile Scrum environments. Skilled in manual testing, API validation, SQL database verification, defect lifecycle management, and test documentation. Brings a unique combination of software quality assurance, SaaS platform administration, systems thinking, and process improvement developed through years of technology administration before specializing in QA. Recognized for analytical problem solving, attention to detail, and delivering reliable software that improves the end user experience.

CORE COMPETENCIES

- | | | |
|-----------------------|-----------------------------|-------------------------|
| • Manual Testing | • SQL Validation | • Cross Browser Testing |
| • Regression Testing | • Defect Management | • Mobile Testing |
| • Smoke Testing | • Test Case Design | • Test Documentation |
| • Functional Testing | • Requirements Traceability | • Process Improvement |
| • Exploratory Testing | • Agile Scrum | • SaaS Platforms |
| • End-to-End Testing | • STLC | |
| • API Testing | • SDLC | |

TECHNICAL SKILLS

QA Tools: Jira • Zephyr • Postman • BrowserStack • Katalon Studio • Selenium IDE • Cypress Studio • JMeter • Rainforest QA

Databases: MySQL • SQL Server • PostgreSQL • DBeaver

Languages & Technologies: SQL • JSON • REST APIs • HTML/CSS (Foundational) • Python (Foundational)

Collaboration: Confluence • GitHub • Microsoft Office • Google Workspace

PROFESSIONAL EXPERIENCE

Quality Assurance Analyst Intern | *Diversociete LLC*

2025

Performed comprehensive software testing within a simulated Agile Scrum environment for a SaaS e-commerce application. Executed the complete Software Testing Life Cycle (STLC), collaborating through sprint ceremonies while validating front-end functionality, APIs, databases, and business requirements using industry-standard QA tools.

- Executed 50+ manual test cases covering functional, regression, exploratory, smoke, and end-to-end testing across a SaaS e-commerce application.
- Designed and executed test scenarios from business requirements and user stories, ensuring traceability to acceptance criteria.
- Logged and tracked defects in Jira with severity, priority, business impact, reproduction steps, and supporting evidence.
- Validated REST APIs using Postman and verified backend data integrity through SQL queries.
- Participated in Agile Scrum ceremonies including sprint planning, standups, sprint reviews, retrospectives, and team handoff meetings.
- Created QA documentation including test plans, RTMs, defect reports, API collections, SQL validation queries, and test execution reports.
- Collaborated with developers and business analysts to clarify ambiguous requirements and improve test coverage.

Technology & Software Administrator | *Harbor of Hope Church*

2020 - 2022

- Administered multiple SaaS platforms supporting membership management, event registration, mobile applications, and digital communications.
- Managed website administration, application content, and user data while maintaining system accuracy and operational efficiency.
- Authored SOPs, process documentation, and user guides to improve consistency and software adoption.
- Coordinated technology workflows, troubleshooting, and software support across staff and ministry teams.

- Designed and managed comprehensive individualized educational systems by integrating curriculum planning, instructional design, progress tracking, and long term academic planning for multiple grade levels.
- Developed structured documentation, planning frameworks, and organizational processes that improved consistency, efficiency, and long term program management.
- Analyzed student performance data and adapted learning strategies to support continuous improvement and measurable educational outcomes.
- Leveraged educational technology and digital tools to organize instructional resources, streamline workflows, and create engaging learning experiences.

SELECTED QA PROJECT

Quality Assurance Internship | *Diversociete LLC* | E-Commerce SaaS Application

2025

Performed end-to-end quality assurance testing within a simulated Agile Scrum environment for a SaaS e-commerce application. Collaborated through the Software Testing Life Cycle (STLC) by analyzing business requirements, designing and executing manual test cases, validating REST APIs and SQL database records, documenting defects, and supporting sprint deliverables using industry-standard QA tools.

Project Scope - Manual quality assurance testing for a SaaS e-commerce application supporting:

- Product Search
- Account Creation
- Shopping Cart
- Checkout
- Discount Codes
- Payment Processing
- Email Confirmations
- Order History

Artifacts Produced

- Test Plan
- 50+ Test Cases
- Requirements Traceability Matrix
- Jira Defect Reports
- Postman API Collection
- SQL Validation Queries
- Test Execution Reports

Tools Used

- Jira
- Zephyr
- Postman
- BrowserStack
- MySQL
- Confluence
- Katalon Studio

EDUCATION & PROFESSIONAL CREDENTIALS

Education & Certifications

Bachelor of Science in Elementary Education | Holy Cross College, South Bend, IN

ISTQB Certified Tester, CTFL Foundation Level

Professional Training

Foundations of Software Testing and Validation | University of Leeds

Software Testing Fundamentals for ISTQB Exams Prep Specialization | Coursera

Software Quality Assurance Professional Training (2025) | Agile Scrum, Manual Testing, API Testing, SQL, Jira, Zephyr, Postman, BrowserStack, Katalon Studio, Requirements Traceability, Defect Management, Cross Browser and Mobile Testing.
